

## Machine Binding (with piping)

Cut 1½ inch strips of fabric (best if matches backing) and sew end to end

Cut 2 inch strips of **piping** fabric and sew end to end

Sew the strips together (right sides together) and press seam allowance to the 2 inch piping fabric

Fold wrong sides together and sew to **back** of quilt with 1½ inch fabric to backing using ¼ inch seam

The raw edges should match to the edge of the backing

Flip binding to front and sew by stitching in the ditch between piping and 1½ inch fabric

Use either thread to match or invisible thread on top and match bobbin thread color to backing

Will look best if the piping ditch matches fold on the back – use a pin to check and then use pins or clips to hold in place for stitching
